

REMARKS

Paragraph 0019 of the application as published has been amended so that the text thereof is now consistent with the text of the parent German application. Specifically, as filed, the English translation of application indicated that the concentration of methyl-4-hydroxybenzoate was 0.01% (10g/100ml). However, the reference to "10g" in the English translation was a typographical error. The correct amount, as indicated in the original German text, was "10mg". For purposes of a direct comparison of the texts, the Examiner is directed to page 5, line 23 of the German text.
